WELCOME

This year marks our 22nd on farm bull sale with our Angus, Simmental and SimAngus bulls. All Angus, SimAngus and Simmental bulls have been tick blooded, 7 in 1, vaccinated for IBR, Vibrovaxed and Pestivirus. Both our line ups have exciting pedigrees throughout the catalogue to offer a range of heifer and cow mating suitable sires. Our sale drafts have been selected to ensure only functional bulls that can last the distance make the draft.

Highlights for 2023 at Yerwal

Our on farm Angus sale ranged from \$5,000-\$12,000 allowing clients to access quality bulls for all budgets.

Our top priced Queensland Simmental Bull Sale (QSBS) was a Red Simmental sired by TNT 90 proof out of our elite Black Simmental donor Yerwal Est Charo J059 sold to Dan and Megan Lamb, QLD a half brother to this bull features at Lot 37 in this years on farm sale.

Our QSBS sale results on all 17/18 bulls sold for a top of \$20,000 (Lot 69 Yerwal Estate Shock Proof) along with lots 63, 64 and 67 all topping \$18,000 with an average of \$12,764.

Ag-grow Emerald Sale Report was 3/3 Bulls sold averaging \$10,333 with our top priced SimAngus Yerwal Estate Santiago selling for \$13,000.

We purchased a new stud Angus Sire Landfall Lorenzo S134, sired by Rennylea L519.

Our newer Angus sires Texas Quinella Q711 and Alkira Renegade R11 sons sell this year.

We have the first Angus Embryo Calves sired by POSS DEADWOOD arrive at Yerwal this year.

Angus

Our Angus sale draft has some exciting bulls that are sired by; Eyes on you, Sterling Pacific, Sterita Park Resolution L195, Sterita Park Complement L19, Spry's Supreme M505, Texas Quinella Q711 and Alkira Renegade R11. Home bred sire Yerwal Est Wisdom P264 still breeds consistently and true to type again.

We value good footed cattle and believe everything starts from the ground up and needs to last the distance; no hoof trimming of sale draft. This year we have once again opted to DNA sire verify all sale bulls however at time of cataloguing some bulls DNA had not returned and will be denoted with # next to their ID and DNA status will be supplied on sale day.

Simmentals

Our Sale draft this year comprises of our Black Simmentals all bulls sired by Savannah Quantico Q103 a Wheatland Kill switch son. The Black simmental enables producers to maintain the coat colour but add more vigour and growth to their commercial operations. Standout son out of our donor whose son sold in QSBS this year for \$20,000 sell Yerwal Est Tycoon T007 a true stud sire prospect in our eyes.

Once again we invite Mt Mooney Simmentals to our sale with three lots; 2 traditional simmentals and 1 SimAngus. Quentin and Renee run a stud Simmental operation and large commercial herd based in Culburra, South Australia.

SimAngus

Our SimAngus bulls offer clients to access the superior weight gain, muscling, meat yield and maternal traits of the Simmental with the meat quality, polled and solid coat attributes of the Angus. SimAngus are able to finish well in the pasture or on feedlot operations.

Save the dates for 2024

In addition to our on farm sale a selection of Yerwal bulls will be available at the following sales:

12th & 13th Feb 2024, February All Breeds held at Gracemere CQLX, QLD.

May 2024 Beef Australia, Yerwal will be exhibiting 3 Simmental bulls in the stud section.

June 2024, Agrow Emerald, QLD.

29th July 2024 Queensland Simmental Bull Sale, Gracemere CQLX, QLD.

What's happening next at Yerwal?

Progeny from new stud Angus sire Landfall Lorenzo S134 due in 2024.

Angus embryos sired by Iceman and Beastmode arrived 2023.

Our Simmental calves sired by Kerrah Dictator have arrived and will be available in our 2025 bull sales.

Purchase of semen of three new exciting Simmental Sires; Kerrah Jaguar J491 (Pp), Kerrah Kingdom K132 (PP) and Opawa Kamikaze (PP) with calves due in 2024.

Thank you again for continuing to support our breeding program from all of us at Yerwal Estate Simmental and Angus Stud.

Trevor, Regan, Connie and family

GUEST VENDOR

MT MOONEY
SIMMENTALS

Welcome from Mt Mooney,

This year we have 3 bulls on offer as a guest vendor at Yerwal Est, this will mark 6 years as a guest vendor here, so thank you to team Yerwal. The two traditional Simmental bulls are full brother ET calves and the SimAngus is out of a very handy Mt Mooney Black Simmental cow.

The bulls have been vaccinated; 7 in 1, Pesti, Vibrio, 3 day, and tick blooded. All have returned a negative Pesti test result and have been semen + morphology tested with a pass.

As our numbers increase, we have had the opportunity to sell bulls into QLD through the Queensland Simmental Bull sale, it has been very rewarding, last year selling 8/8 bulls on offer, with fantastic feedback thus far.

We have some very exciting times ahead at Mt Mooney. In partnership with Yerwal Est we have been able to source some new genetics from New Zealand, so our AI and flush programs are in full swing.

To keep up to date with what we get up to, feel free to follow us on Facebook - Mt Mooney Simmentals or our website www.mtmooney.com.

Good luck and thank you for your support.

Quentin and Renee Mooney
Mt Mooney Simmentals

IMPORTANT INFORMATION

Inspections

The **Simmental**, **SimAngus** and **Angus** sale bulls will be available for inspection at the on farm SA Beef Field Day on Monday the 5th of February 2024 from 9am (SA time).

The **Simmental**, **SimAngus** and **Angus** sale bulls will be available for inspection on sale day, Wednesday 7th February 2024 from 2pm (SA time). Complimentary refreshments will be available at the sales to all visitors.

Photos and Video

Photos published in this catalogue of the bulls were captured the 10th of January 2024 by GB Creative. Videos of each lot will be uploaded on Auctions Plus website closer to the sale date.

Transport

Complimentary transport is available within South Australia, Victoria, New South Wales and southern Queensland and can be arranged upon request.

Buyers Registrations

Buyers are required to register with the selling agents prior to the commencement of the sale and to display their registration numbers at the fall of the hammer.

Auctions Plus registration instructions will provide buyers more details on how to register prior to the sale (see page 7). If there are any issues with registering or navigation the auction platform please call (02) 9262 4222 for further support.

Sale Conditions

Conditions of sale by auction in South Australia apply. All sale lots are sold exclusive of GST. Please contact your selling agents to arrange phone bidding.

Agent Rebate

A 3% rebate is offered for outside agents if prospects are introduced to the selling agents in writing at least 24 hours prior to the sale.

Suffix Key

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

PV: both parents have been verified by DNA.

SV: the sire has been verified by DNA.

DV: the dam has been verified by DNA.

#: DNA verification has not been conducted.

E: DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

Disclaimer

Every effort has been taken to ensure that the information in this sale catalogue is correct at the time of publication. All reasonable care has been taken in its preparation however no responsibility is taken for any inadvertent errors or omissions.

AuctionsPlus

How to Register and Bid on AuctionsPlus

1

Go to www.auctionsplus.com.au to register at least 48 hours before the sale.

2

Select “**Sign Up**” in the top right hand corner.

3

Fill out your name, mobile number, email address and create a password.

4

Go to your emails and confirm the account.

5

Return to AuctionsPlus and log in.

6

Select “**Dashboard**” and then select “**Request Approval to Buy**”.

7

Fill in buyer details and once completed go back to Dashboard.

8

Complete buyer induction module (approx. 30 minutes).

9

AuctionsPlus will email you to let you know that your account has been approved.

10

Log in on sale day and connect to auction.

11

Bid using the two-step process – unlock the bid button and bid at that price.

12

If you are successful, the selling agent will contact you post sale to organise delivery and payment.

For more information please contact us on:

Phone: (02) 9262 4222

Email: info@auctionsplus.com.au

LET'S TALK ABOUT THE 2024 ANGUS AND SIMMENTAL BULL SALE DRAFT

Climate/Conditions - What have they have been run in?

Both Angus and Simmental bulls have been running the majority of the time as one large contemporary group (only exception being to prevent injuries due to fighting, after all boys will be boys) since weaning on farm at Yerwal Estate, Lucindale, SA. This year we had Peter Barr educate the bulls with dogs post weaning. All bulls are familiar with utes, motor bikes and dogs.

Our property has deep sandy soils that make feet a big focus. We don't believe in hoof trimming our bulls and the soil won't hide poor feet. Regan's strict selection of our draft and females ensure our bulls/their progeny can last the distance. Any progeny in the herd that have poor feet (claw set or angle) are instantly culled regardless of the pedigree/data.

Nutrition - what have they been eating?

For the first 12 months of the sale bulls life they are grazed on pastures in the paddock while on mum. Once weaned they go on a high roughage ration while still grazing in the paddock. Our pastures include; clovers and perennial grasses such as phalaris, ryegrass and clovers. Timing of introducing the high roughage feed ration is dependent on the season. We try to maintain an even growth weight gain without having to push them. This means their gut nutrition is not highly disturbed and when taken to their new home with minimal effects to gut health and have the ability to maintain their condition while transitioning into work. We take great care to ensure their mineral level and nutrition is balanced to ensure it is balanced ready for the joining season.

DNA, Polled and Colour Testing

All Angus and Simmental Bulls have been DNA tested. This gives our clients more accurate data in terms of sire verification, coat colour assurance and horn status. We have included some information with further explanation of what these results indicate. In terms on sire verification we are guaranteeing bulls are sire verified for your breeding programs accuracy.

Simmental Horn Status

Homozygous polled means the bull carries two polled genes. Heterozygous polled means the bull will only carry one polled gene and one horned gene.

Bull	Cow	Progeny
Homo Polled	Homo Polled	100% Polled
	Hetero Polled	100% Polled
	Horned	100% Polled
Hetero Polled	Homo Polled	100% Polled
	Hetero Polled	75% Polled, 25% Polled
	Horned	50% Polled, 50% Horned

Simmental Coat Colour

Homozygous Black - the bull carries two copies of the black gene. Heterozygous Black the bull carries one black gene and one red gene. Red (assuming the bull is diluter free) the bull carries two red genes.

Bull	Cow	Progeny
Homo Black	Homo Black	100% Black
	Hetero Black	100% Black
	Red	100% Black
Hetero Black	Homo Black	100% Black
	Hetero Black	75% Black, 25% Red
	Red	50% Black, 50% Red
Red	Homo Black	100% Black
	Hetero Black	75% Black, 25% Red
	Red	100% Red

What is the Fertility and Structural Guarantee?

Yerwal Estate guarantees the structural integrity and fertility of all of its sale bulls. The entry of every bull constitutes a guarantee by the us (Yerwal Estate) that the bull will be replaced or the purchase price* refunded if a bull proves totally infertile within the first 12 months from the date of purchase. All bulls have been vet and semen checked (morphology results to be included in supplementary sheet).

* Without interest, expenses, costs and damages.

What is the Health Status of the bulls?

Yerwal Estate is Johne's Beef Assurance Score (J-BAS) accredited and has a score of J-BAS 6. All bulls were tested free of Pestivirus and have been vaccinated with Ultravac 7 in 1, IBR, tick blooded, Pestigard and Vibrovax. We recommend annual boosters for 7 in 1, pestigard and Vibrovax.

Scan Data

All sale bulls have been scanned by Mr Max Bowman who is an accredited scanner; Accreditation # 1026 on the 16/11/23. A supplementary sheet will be supplied at the sale and online via Auctions Plus including current weights and scrotal measurements.

UNDERSTANDING THE TRANSTASMAN ANGUS CATTLE EVALUATION (TACE)

What is the TransTasman Angus Cattle Evaluation?

The TransTasman Angus Cattle Evaluation is the genetic evaluation program adopted by Angus Australia for Angus and Angus influenced beef cattle. The TransTasman Angus Cattle Evaluation uses Best Linear Unbiased Prediction (BLUP) technology to produce Estimated Breeding Values (EBVs) of recorded cattle for a range of important production traits (e.g. weight, carcase, fertility).

The TransTasman Angus Cattle Evaluation is an international genetic evaluation and includes pedigree, performance and genomic information from the Angus Australia and Angus New Zealand databases, along with selected information from the American and Canadian Angus Associations.

The TransTasman Angus Cattle Evaluation utilises a range of genetic evaluation software, including the internationally recognised BLUPF90 family of programs, and BREEDPLAN® beef genetic evaluation analytical software, as developed by the Animal Genetics and Breeding Unit (AGBU), a joint institute of NSW Agriculture and the University of New England, and Meat and Livestock Australia Limited (MLA).

What is an EBV?

An animal's breeding value can be defined as its genetic merit for each trait. While it is not possible to determine an animal's true breeding value, it is possible to estimate it. These estimates of an animal's true breeding value are called EBVs (Estimated Breeding Values).

EBVs are expressed as the difference between an individual animal's genetics and a historical genetic level (i.e. group of animals) within the TACE genetic evaluation, and are reported in the units in which the measurements are taken.

Using EBVs to Compare the Genetics of Two Animals

TACE EBVs can be used to estimate the expected difference in the genetics of two animals, with the expected difference equating to half the difference in the EBVs of the animals, all other things being equal (e.g. they are joined to the same animal/s).

For example, a bull with a 200 Day Growth EBV of +60 would be expected to produce progeny that are, on average,

10 kg heavier at 200 days of age than a bull with a 200 Day Growth EBV of +40 kg (i.e. 20 kg difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Or similarly, a bull with an IMF EBV of +3.0 would be expected to produce progeny with on average, 1% more intramuscular fat in a 400 kg carcase than a bull with a IMF EBV of +1.0 (i.e. 2% difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Using EBVs to Benchmark an Animal's Genetics with the Breed

EBVs can also be used to benchmark an

animal's genetics relative to the genetics of other Angus or Angus infused animals recorded with Angus Australia.

To benchmark an animal's genetics relative to other Angus animals, an animal's EBV can be compared to the EBV reference tables, which provide:

- the breed average EBV
- the percentile bands table

The current breed average EBV is listed on the bottom of each page in this publication, while the current EBV reference tables are included at the end of these introductory notes.

For easy reference, the percentile band in which an animal's EBV ranks is also published in association with the EBV.

Considering Accuracy

An accuracy value is published with each EBV, and is usually displayed as a percentage value immediately below the EBV.

The accuracy value provides an indication of the reliability of the EBV in estimating the animal's genetics (or true breeding value), and is an indication of the amount of information that has been used in the calculation of the EBV.

EBVs with accuracy values below 50% should be considered as preliminary or of low accuracy, 50-74% as of medium accuracy, 75-90% of medium to high accuracy, and 90% or greater as high accuracy.

Description of TACE EBVs

EBVs are calculated for a range of traits within TACE, covering calving ease, growth, fertility, maternal performance, carcase merit, feed efficiency and structural soundness. A description of each EBV included in this publication is provided on the following page.

UNDERSTANDING ESTIMATED BREEDING VALUES (EBVS)

Calving Ease/Birth	CEDir	%	Genetic differences in the ability of a sire's calves to be born unassisted from 2 year old heifers.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
	CEDtrs	%	Genetic differences in the ability of a sire's daughters to calve unassisted at 2 years of age.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
	GL	days	Genetic differences between animals in the length of time from the date of conception to the birth of the calf.	Lower EBVs indicate shorter gestation length.
	BW	kg	Genetic differences between animals in calf weight at birth.	Lower EBVs indicate lighter birth weight.
Growth	200 Day	kg	Genetic differences between animals in live weight at 200 days of age due to genetics for growth.	Higher EBVs indicate heavier live weight.
	400 Day	kg	Genetic differences between animals in live weight at 400 days of age.	Higher EBVs indicate heavier live weight.
	600 Day	kg	Genetic differences between animals in live weight at 600 days of age.	Higher EBVs indicate heavier live weight.
	MCW	kg	Genetic differences between animals in live weight of cows at 5 years of age.	Higher EBVs indicate heavier mature weight.
	Milk	kg	Genetic differences between animals in live weight at 200 days of age due to the maternal contribution of its dam.	Higher EBVs indicate heavier live weight.
Fertility	DtC	days	Genetic differences between animals in the time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving.	Lower EBVs indicate shorter time to calving.
	SS	cm	Genetic differences between animals in scrotal circumference at 400 days of age.	Higher EBVs indicate larger scrotal circumference.
Carcase	CWT	kg	Genetic differences between animals in hot standard carcase weight at 750 days of age.	Higher EBVs indicate heavier carcase weight.
	EMA	cm ²	Genetic differences between animals in eye muscle area at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate larger eye muscle area.
	Rib Fat	mm	Genetic differences between animals in fat depth at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate more fat.
	P8 Fat	mm	Genetic differences between animals in fat depth at the P8 rump site in a 400 kg carcase.	Higher EBVs indicate more fat.
	RBY	%	Genetic differences between animals in boned out saleable meat from a 400 kg carcase.	Higher EBVs indicate higher yield.
	IMF	%	Genetic differences between animals in intramuscular fat (marbling) at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate more intramuscular fat.
Feed/Temp.	NFI-F	kg/day	Genetic differences between animals in feed intake at a standard weight and rate of weight gain when animals are in a feedlot finishing phase.	Lower EBVs indicate more feed efficiency.
	Doc	%	Genetic differences between animals in temperament.	Higher EBVs indicate better temperament.
Structure	Claw Set	score	Genetic differences in claw set structure (shape and evenness of claws).	Lower EBVs indicate a lower score.
	Foot Angle	score	Genetic differences in foot angle (strength of pastern, depth of heel).	Lower EBVs indicate a lower score.
	Leg Angle	score	Genetic differences in rear leg structure when viewed from the side (angle at front of the hock).	Lower EBVs indicate a lower score.
Selection Index	\$A	\$	Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular market end-point, but identifies animals that will improve overall net profitability in the majority of commercial, self replacing, grass and grain finishing beef production systems.	Higher selection indexes indicate greater profitability.
	\$A-L	\$	Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular market end-point, but identifies animals that will improve overall net profitability in the majority of commercial, self replacing, grass and grain finishing beef production systems. The \$A-L index is similar to the \$A index but is modelled on a production system where feed is surplus to requirements for the majority of the year, or the cost of supplying additional feed when animal feed requirements increase is low. While the \$A aims to maintain mature cow weight, the \$A-L does not aim to limit the increase in mature cow weight as there is minimal cost incurred if the feed maintenance requirements of the female breeding herd increase as a result of selection decisions.	Higher selection indexes indicate greater profitability.

Notes: T113 is the first Radical son to sell at Yerwal, he's in the top 20% of the breed for calving ease daughters. A definite heifer bull option on both data and pedigree suitable for any program looking to retain females in the future. Radical is known for good footed animals and sired by Murdeduke Kicking. T113 has positive fats in the top 20% of the breed. A bull with calving ease and carcass traits to suit a variety of programs.

Notes: T127 is the first Texas Quinella Q711 son to sell in our draft. These sons sure do catch your eye phenotypically and have the pedigree behind them. Quinella Q711 is a half brother to Texas Iceman out of the same dam, rest assured the depth and consistency of his pedigree will give you confidence for any operation looking to retain females in a self replacing herd or marketability to selling females in the future. He's positive fat with a good phenotype surely to catch your eye. He is a sleep easy heifer bull option on pedigree and birth weight.

Notes: T77 will definitely catch your eye on data, pedigree and phenotype. He's in the top 4% for 200 day growth, top 6% for 400 days and top 8% for 600 days at +144. His mature cow weight is in the top 7% of the breed which for any producers looking to retain daughters can be rest assured they will perform. His fertility lands him in the top 2% for days to calving and top 19% for scrotal. He's in the top 11% for carcass weight with +84 - what isn't here to like about this Wisdom son. He's one of Regan's picks and hence why he lands in the top end of the draft. There's a whole lot to love both on paper and in the flesh.

Notes: T501 is the first of the Sterita Park Resolution L195 sons to sell in our draft here. His birth to growth data says it all and matches his exceptional phenotype. He's in the top 10% or better for 400 days, 600 days and mature cow weight. He will breed those larger frame females with good carcass data to add. He's in the top 4% carcass weight with +93, he's positive fats with a good IMF of +2.1. Resolution sons breed larger framed, thick and well muscled progeny with heavier weaning weights. Look to T501 a pedigree to breed you a good type with the added bonus of balanced data.

Traits Observed: BWT, 600WT, SC, Scan (EMA, Rib, Rump, IMF), Genomics

Notes: T124 is in the top 20% or better for all his growth traits, mature cow weight, scrotal size, carcass weight and retail beef yield. He scores extremely well with his EMA at +9.0. We have said it before these Quinella sons sure do have a lot going for them and T124 sure does tick a lot of boxes. If you are looking for a bull with a dual purpose T124 will cover what you're looking for.

Notes: T42 is another Complement son in our sale draft and look at that calving ease data. He is in the top 1% for all calving ease traits. He's positive fats with a good IMF +2.9%. T42 definitely is an all rounder, a calving ease bull that will still hit the MSA grids. He's a bull that should not be overlooked.

Maximise your Stud Stock Sales with Australia's only dedicated Cattle Stud Marketing Agency

Stud Stock Marketing Services has the end-to-end means to market and promote your stud breeding operation, physical sales, genetic sales, online sales, paddock sales and even Breed Association.

Our team can assist to identify who your primary market is, identify the best ways to market and promote your operation to them and then perform some or all of the necessary marketing/promotion efforts at your request.

Create marketing campaigns, industry leading websites, targeted social media, fit-for-purpose video and TV commercials, high quality print (catalogues/flyers/ newspaper articles) and then there's design and production of banners, shed cards, branded merchandise and more.

MARKETING STRATEGY, PLANS AND CAMPAIGNS

Develop a marketing campaign that includes how, when and where to market and promote. Identify how return on investment (ROI) is measured so that you only spend money where its needed.

BRANDING AND GRAPHIC DESIGN

Align your brand with your desired market segment. Make your brand reflect the quality and professionalism of your operation every time it's visible to a potential buyer.

WEBSITE DESIGN, BUILD, HOST AND MAINTAIN

Create a website that markets and promotes your operation 24/7, 365 days a year. Create an industry leading website that improves your Google Ranking and creates more leads for your business.

DIGITAL MARKETING AND FACEBOOK CAMPAIGNS

Have you ever received metrics on Facebook posts or campaigns you have paid for? Likely not, because they don't stack up and are overpriced. Our offering is affordable, and it works.

VIDEO PRODUCTION AND EDITING

Video sells better than photos or print. Our team can develop videos on anything you require including bulls for sale, stud sales, TV ads and more. We have a three-tiered solution offering pricing for every budget.

LAUNCH OR GROW YOUR STUD SALE

Let us launch, improve or manage your entire bull sale. Only selling out of the paddock or online? We have a solution to sell your animals out of the paddock for a better return, one that has been tested and will get you results.

ELEVATE YOUR CATTLE STUD BRAND

EPD INFORMATION

With the introduction of the IGS performance recording system for Simmental cattle, IGS is the world's largest animal performance recording system.

One of the major changes is the breeding figures being reported as Estimate Progeny Differences (EPDs), rather than Estimated Breeding Values (EBVs). The difference between the two is simple.

Effectively, an EBV is an animal's own genetic value for a particular trait. However, the animal can only pass half of this onto their progeny. EPDs have the "half" already accounted for. That is, an EPD is the genetic merit of an animal's progeny – what they will pass onto their progeny.

Simmental - Traditional, Fullblood and Simbrah Register Breed Average

	CED	BW	WW	YW	MILK	MCE	MWWT	STAY	DOC	CW	REA	FAT	MARB	YG	AAPI	ATI	API	TI

Polled and Coat Color Information

PP - Homo Polled - the bull carries two copies of the polled gene.

Homo Polled Homo Polled 100% Polled
Hetero Polled 100% Polled
Horned 100% Polled

Pp - Hetero Polled - the bull carries one polled gene and one horned gene.

Hetero Polled Homo Polled 100% Polled
Hetero Polled 75% Polled, 25% Horned
Horned 50% Polled, 50% Horned

Homo Black - the bull carries two copies of the black gene.

Homo Black Homo Black 100% Black
Hetero Black 100% Black
Red 100% Black

Hetero Black - the bull is black in color, but carries one black gene and one red gene. Black is dominant to red, so the red color is not expressed when it is paired with a black gene.

Hetero Black Homo Black 100% Black
Hetero Black 75% Black, 25% Red
Red 50% Black, 50% Red

Red - the bull carries two copies of the red gene.

This example assumes the bull is diluter free.

Red Homo Black 100% Black
Hetero Black 75% Black, 25% Red
Red 100% Red

Notes: Tycoon is the pick of our black simmental draft of bulls. He's out of our most proven and lead donor cow J059 who doesn't miss a beat. Tycoon oozes exceptional length, muscle, thickness and is structurally well put together. He's Heterozygous black and homozygous polled. This guy is a definite stud sire in the making with all the right things going for him. Yerwal to retain semen for in herd use.

Yerwal Estate Shock Proof sold
for \$20,000 to D & M Lamb, QLD

In addition to their own sales in South Australia, **Yerwal Estate Simmental Stud** will be offering twenty bulls at the Queensland Simmental Bull Sale at the CQLX Selling Complex, Gracemere on 29th July 2024.

Our top priced Simmental bull sold for \$34,000 at the 2022 Queensland Simmental Bull Sale. Yerwal Estate Rockhampton sold to D&A Humphries of Jericho, Queensland to who run a large scale Simbrah program.

2023 saw Yerwal Estate draft 18 bulls in the Queensland Simmental Bull Sale at Gracemere (Queensland) in July. In a strong market but with many Queensland Commercial Cattle Operations yet to see rain Yerwal bulls performed very strongly achieving a 94% clearance at an average of \$12,764. Following the sale demand was extremely strong with a number of Yerwal Estate Traditional and Black bulls sold into Queensland in the following months. The Northern market has a preference for a larger framed animal with progeny frequently growing out to suit both the Jap Ox and Bullock Markets over high bos indicus content females. This year Yerwal has carefully selected bulls of a type desirable to Southern Markets which are on offer right here in South Australia with a second consignment once again headed to Queensland in July.

Yerwal Estate has been selling bulls into the Queensland Market for many years and in recent years bulls were sold into Duaringa, Maryborough and Rolleston. These bulls have been used primarily over high bos-indicus content cattle which is a contrast to the bulls sold in southern states.

In these locations Yerwal Estate bulls are most commonly used over Angus, in Commercial and Stud Simmental Operations and also in operations targeting the heavy Vealer trade. This demonstrates the versatility of the Simmental Breed and the strength of Yerwal Estate's offering.

The Queensland Simmental Bull Sale currently has 140 bulls nominated from 13 different studs representing every main land state in Australia. The sale is unique in that the following commitments must be adhered to by all vendors.

DEMONSTRATE INTEGRITY OF BULLS TO PROVIDE BUYERS "PIECE OF MIND"

Science and independent experts are a great way to assist in assessing the suitability of a sale bull. All bulls entered in the sale must be vet checked, DNA verified to sire, mouthed (to provide an indication of age), semen tested (morphology testing optional), EMA, IMF, P8, Rib and Scrotal Circumference measured. Bulls are also weighed at sale location to provide buyers with a true representation of weight.

All bulls entered are 8/8 registered purebred with the Simmental Association of Australia or Fleckvieh Association of Australia to guarantee buyers of hybrid vigour which is critical for an F1 cross.

NO HOOF TRIMMING OR BODY CLIPPING NO EXCEPTIONS

A purchasing decision including consideration of coat or feet type at sale should be genuine. Animal soundness evaluations are to indicate no visual evidence of hoof-trimming on certificates. Vendor participation is also based on head and neck clipping being permitted (though not preferred).

Cutting hair from ears, under pizzle, bottom of tail and spikes on top of tail set with scissors is the preferred presentation of sale bulls for the astute cattle producer.

VACCINATIONS ARE IMPORTANT AND SO IS BIO-SECURITY

No one wants to introduce pesti-virus or any other disease into a breeding herd that is healthy and free from bio-security risks. Mandatory (Minimum) Vaccinations for bulls in the Queensland Simmental Bull Sale are 3-Germ (blooded), 3- Day Sickness, 7-1, Botulism with Bulls tested Pesti-Virus Free.

A SALE WITH A "BIG TAIL ON IT" IS A WASTE OF TIME FOR BUYERS AND VENDORS

In no instances will a bull previously entered in another sale (or advertised for sale independently) be eligible for entry to this sale. There are absolutely no exceptions to this rule and any vendor attempting to do this will be immediately removed from the sale. The tight entry conditions and theme of the sale have also been created to minimise "any tail" in bulls.

FURTHER INFORMATION ON THE QUEENSLAND SIMMENTAL BULL SALE CAN BE FOUND AT www.qldsimmmentalbullsale.com.au OR BY VISITING THE QUEENSLAND SIMMENTAL BULL SALE FACEBOOK PAGE.
